

How It Works:

#1: Detect

- The blade carries a small electrical signal.
- When skin contacts the blade, the signal changes because the human body is conductive.
- The change to the signal activates the safety system.

WATCH
www.sawstop.com
VIDEO

#2: Activate

- An aluminum brake springs into the spinning blade, stopping it.
- The blade's angular momentum drives it beneath the table, removing the risk of subsequent contact.
- Power to the motor is shut off.

All this happens in less than 5 milliseconds!

#3: Reset

- **Resetting the saw yourself is easy.** Simply replace the blade and affordable brake cartridge and your saw is operational. The entire reset process takes less than five minutes.

SawStop Now.

The Problem Is Real

- 1 table saw injury every 9 minutes.
- 10 table saw amputations every day.*

The Consequences Are Life Changing

A saw injury is traumatic.
The consequences can last a lifetime.

- Extreme Pain
- Permanent loss of use
- Loss of income-earning abilities
- Loss of ability to pursue hobbies

WITHOUT SawStop

Table saw accident after middle & index fingers were fused together.
DO NOT WAIT UNTIL IT IS TOO LATE.

Over 700 Confirmed Fingers Saved. And Counting...

Customer Comments

“ This saw would be worth its purchase price even without the brake. It's fit and finish is unparalleled. **It's truly the "Rolls Royce" of table saws.**
Chris D. - Maryland

I no longer worry that somebody will be injured using our table saws when I'm at work or away. **These table saws actually let me sleep better at night....** Priceless.
Kevin G. - Minnesota

It has made our school **a safer place to work and learn.** In 20 years of using table saws, these saws are the finest operating saws I have used and seen.
James K. - Oklahoma

I can't believe anyone would use anything but this saw. Being a PGA Golf Professional in addition to woodworking, **I can't thank SawStop enough for having all of my fingers.**
woodworker - California

I replaced two perfectly serviceable, well known name brand saws, **all in the interest of safety and corporate responsibility.**
Vic N. - Florida

My wife said - and I quote - **"This is what I want you to get so I don't have to worry when you're downstairs"**. That's all I needed to hear. Thanks again for the brake technology and a quality saw in one package.
Larry K. - Illinois

CONTRACTOR SAW

Quality and Value

Combines SawStop's legendary stopping mechanism with premium features like advanced dust collection and professional upgrade options. Precision, performance and safety all come together to make this the right choice for experts looking for a reliable saw at an affordable price.

BLADE SAFETY

- SawStop's patented safety system
- Riving knife reduces the risk of kickback
- Diagnostic system ensures the saw is ready to respond
- Micro Blade Guard

POWER

1.75 HP
1ph, 120V, 14A

FENCE & RAIL SYSTEMS

- 30" Aluminum Extrusion Fence & Rails
- 36" T-Glide Fence & Rails
- 52" T-Glide Fence & Rails

DUST COLLECTION

- Below-table dust shroud
- 4" below-table dust port
- Optional:**
- Dust Collection Blade Guard
- Overarm Dust Collection
- 4" & 2.5" Dust Collection Panel

DIMENSIONS & WEIGHT

- **W/ 30" ALUMINUM FENCE**
58 1/2" w x 40" d x 34 3/4" h
265 lbs #CNS175-SFA30
- **W/ 36" FENCE SYSTEM**
69 1/8" w x 45" d x 34 3/4" h
365 lbs #CNS175-TGP36
- **W/ 52" FENCE SYSTEM**
85 1/4" w x 45" d x 34 3/4" h
390 lbs #CNS175-TGP52

COMMON UPGRADES

- Mobile Base

MOBILITY

DUST COLLECTION

The most hazardous table saw threat is blade contact. The second most hazardous threat is dust.

The Centers for Disease Control (CDC) has classified sawdust as a cancer-causing carcinogen. SawStop addresses this safety hazard with the most complete solution available. Combined on a SawStop cabinet saw, the shroud and dust collection guard capture an industry-leading 99% of created dust.

- Reduce inhalation of particles
- Improve workplace cleanliness
- Minimize dust-related wear and tear
- Effective even on narrow cuts
